LOCKED DECISIONS

Five pushes shipped today: Google Translate kill, GEO refactor (areaServedCities), A11y skip-nav + focus-visible, GEO H2 sweep (43 statements → questions), and the FAQ schema-without-content fix (FAQSection refactored to data-driven, 13 pages now render visible FAQ matching their schema with speakable classes baked in). Aggregate moved from **91 → 97 (+6)**. Three remaining drags (3 a11y pts for unaudited heading hierarchy, 5 GEO pts for the 84 legitimately-statement H2s, 5 content pts for blog Article.image) are all single-edit items with diminishing returns vs other priorities.
