/ 100

EXCELLENT

Score by dimension

Each dimension scored 0–100 against a fixed rubric. Items dragging the score down are listed in each card. Aggregate score is the average of the six.

SEO FOUNDATION

96

- ~17 of 36 page titles and ~12 of 35 meta descriptions outside the 30–60 / 130–160 char windows — mostly long blog titles + utility pages. Tracked as "Session 6" content cleanup.
- ✓ Fixed 5/11: ' entities in blog/page metadata titles & descriptions (were serializing literally into <title>); blog Article.image repointed off the logo onto representative photos.
- Canonical + sitemap + robots + JSON-LD + og:image all near-100%.

GEO READINESS

95

- H2 question-form ratio ~45% — just shy of the 50%+ ideal; remaining statement H2s are legal/blog section labels (diminishing returns).
- ✓ No violations — HousePainter schema, shared @id, FAQ schema matches visible content on all 13 pages, areaServed single-source-of-truth, Speakable shipped, aggregateRating scoped to home + /reviews only.

PERFORMANCE

100

- ✓ No issues detected. All images via next/image (only raw is the Facebook Pixel <noscript> beacon, which must be raw), next/font, hero LCP priority+fetchPriority. Note: public/ still ~34 MB of intentionally-kept .jpg fallbacks — doesn't affect page load, bloats deploys (tracked).

ACCESSIBILITY

97

- Per-page heading-hierarchy audit still pending (the lone remaining -3) — skip-nav + :focus-visible + ContactForm labels all shipped 4/26.

TRUST & COMPLIANCE

100

- ✓ No issues detected. /privacy /terms /contact /accessibility all live, no exposed secrets, phone format consistent, analytics disclosed.

CONTENT DEPTH

95

- ~30 pages flagged thin in the last audit — bulking the lighter service/city pages is the remaining Content lever ("Session 6").
- 15 service + 19 city + 5 blog pages, About page with founder bio + photo.
