What we shipped this period

8 items

COMPLETED -- LIVE ON SITE

Work we finished, tested, and deployed during May 2026. Each item below is already in production at **ext.js**.

TTFB 2296ms — every page dynamic due to await headers() in root layout	Closed 2026-05-25
Multi-root-layout refactor: moved English/Spanish routes into (en)/(es) groups, deleted headers() call. 59/59 pages now static.	
346 structured-data errors — missing address on LocalBusiness + missing provider on nested Services	Closed 2026-05-25
Added PostalAddress + provider @id refs on nested Services. ~300 of 346 errors closed.	
26 of 50 pages under 500 words — city template too sparse	Closed 2026-05-25
Added 3 localFaqs per city (19 cities) + FAQPage schema. ~450 -> 700+ words each.	
Our Work page is almost entirely images and links	Closed 2026-05-25
Added 250-word prep/prime/paint/protect section.	
Blog index page lacks substantive intro copy	Closed 2026-05-25
Added 150-word intro between hero and post grid.	
Content-Security-Policy header missing	Closed 2026-05-25
CSP header added in next.config.ts with whitelisted third parties.	
Built `wrap-report` skill (`<websites>/	2026-05-25
Built `wrap-report` skill (`<websites>/.claude/skills/wrap-report/`) — the missing client-facing monthly/quarterly deliverable that bundles three lanes in one PDF: (1) what we shipped this period (green, pulls from PROGRESS `## Shipped` + audit-tracker closed-in-period findings),...	
Seeded 6 standard client-side findings in PF ledger (`external	2026-05-25
Seeded 6 standard client-side findings in PF ledger (`external.gbp-claim`, `yelp-nap-sync`, `bbb-listing`, `review-asks`, `gbp-photo-refresh`, `project-photos`) — all `actor=client`....	

2 What we need from you

5 items

ACTION REQUIRED -- ONLY YOU CAN DO THESE

These items live outside the website code and depend on your action. For local SEO and AI search visibility, off-site signals (Google Business Profile, Yelp, BBB, reviews) carry roughly half the weight of the website itself. Closing these unlocks the full value of the on-site work below.

Ask 5 recent customers for Google reviews

~1.0h

Reviews are the biggest local-ranking factor we can't influence from the codebase. A steady drip beats a big burst every six months.

Confirm your Yelp listing matches the website

~0.5h

Mismatched business name, address, phone, or description between Yelp and your website confuses Google's local algorithm and dilutes ranking signals.

Upload fresh project photos to Google Business Profile

~0.5h

Google ranks listings with recent photo activity higher in the local pack. Aim for 5+ new shots per quarter -- before/after if you have them.

Send us photos of your 5 most recent jobs

~0.5h

Fresh project shots on the site signal an active business and give us material for blog posts + city-page testimonials.

Claim or update your Better Business Bureau listing

~0.5h

Even without paid accreditation, the BBB listing is a citation Google checks. The description should match what's on your site.

3 Our roadmap

2 items, ~2h

PLANNED -- WE WILL DELIVER ON THE SCHEDULE BELOW

Codebase work we have scheduled across upcoming sessions. Phases are ordered by impact-per-hour so you see meaningful score movement after each one.

Phase 1 -- Quick wins

2 items, ~1.5h -> ~99.5/100 projected

Polish and small content edits we can knock out in a single sitting. Score-moving but low-risk.

- Polish remaining meta descriptions into the 130-160 character sweet spot
- Identify and replace the one broken outbound link flagged by the audit

Projected score lifts are calculated from our internal six-dimension rubric and are confirmed by re-running the audit after each phase ships.
