98

/ 100

EXCELLENT

Score by dimension

Each dimension scored 0–100 against a fixed rubric. Items dragging the score down are listed in each card. Aggregate score is the average of the six.

SEO FOUNDATION99

- OG image not declared on 2 of 37 routes (–1 pt)
— likely /quiz redirect + 1 other

GEO READINESS91

- H2 question ratio 88 of 156 (56%) — past the 50% target but short of full credit at 100% (–9 pts). Remaining statement H2s are blog editorial headings + legal page section labels.

PERFORMANCE98

- 21 raster files >500KB in public/ — kept as .jpg fallbacks per locked decision; nothing references them at runtime but they bloat each deploy (–2 pts).

ACCESSIBILITY97

- Per-page heading hierarchy not yet formally audited — Session 4 remainder still open (–3 pts).

TRUST & COMPLIANCE100

LOCKED DECISIONS

Notes: Hreflang scoring (10 pts) marked **N/A** and redistributed across the other 7 SEO items — the site has 4 Spanish landing pages but isn't structured as a parallel multilingual mirror, so bidirectional hreflang isn't the right shape here.

Same-day movement: earlier run today scored 96. Two items addressed in this session: (1) Vercel Analytics disclosure added to /privacy (Trust 97 → 100), and (2) two inline project photos added to each of the 4 blog posts that previously only rendered a hero (Content 92 → 100). Aggregate 96 → 98.

Re-run **/site-score** after each significant work session to track the aggregate trend over time. The score line gets appended to PROGRESS.md so historical movement is auditable.
