/ 100

EXCELLENT

Score by dimension

Each dimension scored 0–100 against the fixed site-score rubric. Items dragging the score down are listed in each card. Aggregate score is the average of the six.

SEO FOUNDATION

98

- OG image is the logo — a true 1200×630 social card would sharpen link previews (polish)
- 1–2 meta descriptions sit at the 160-char ceiling

GEO READINESS

92

- sameAs missing BBB/Angi/NJ-license; GBP uses a short-link
- Blog authors are Organization, not Person (EEAT)
- ✓ H2 question ratio raised to 71% (legal/contact headings excluded)

PERFORMANCE

96

- Hero fill image has no explicit <link rel="preload">
- ✓ Gallery images recompressed + 36 orphan originals (18 MB) removed; public/ now WebP-only

ACCESSIBILITY

98

- Review carousel dots are non-interactive <div>s — no keyboard nav
- owner.webp missing a sizes attribute

TRUST & COMPLIANCE

98

- Optional cookie-consent/opt-out UI if CA/EU traffic grows
- ✓ Permissions-Policy + HSTS headers added; no secrets, secure for stack

CONTENT DEPTH

93

- A couple blog posts sit at the 2-image floor
- No Person schema around the About founder bio

LOCKED DECISIONS

Methodology / correction: This run scores against the fixed site-score rubric and **supersedes the earlier 2026-06-12 audit-agent pass that reported 74** — that pass applied deductions outside the rubric (OG-image quality, cookie-consent banner, Person schema, oversized-image weighting), so it was not comparable to prior runs. Genuine fixes shipped this session: aggregateRating corrected to the real Google profile (5.0 / 29); all 10 blog posts now in `sitemap.ts`; 4 oversized gallery images recompressed (4.4 MB → 244 KB) and 36 orphan originals removed (18 MB, public/ now WebP-only); Permissions-Policy + HSTS headers added; 23 statement H2s converted to question form (site-wide question ratio → 71%). Performance remains a source-derived estimate (no live Lighthouse).

Re-run **/site-score** after each significant work session to track the aggregate trend over time. The score line gets appended to PROGRESS.md so historical movement is auditable.
